

NEW BALDWIN HARDWARE

Baldwin has released quite a bit of new hardware. They are pushing the design envelope very hard and have come up with some compelling new locks. New product lines are the Couture, Bronze and the International Contemporary Collections. Below are a few pictures of the new designs.

We buy on a factory direct basis from Baldwin, so pricing is very competitive and the Baldwin fit and finish are superb.

Here is a link to the PDF section of the Baldwin website that shows all the new designs available.

This is a tough time for our industry, but we will continue to add new product lines and improve our internal systems to make sure we are the best door and window supplier on the Central Coast. As always thank you for your business.

Sincerely,

Central Coast Door and Window
